EXPERIENCE

JUNIOR SOFTWARE DEVELOPER | Coder Academy

Feb 2020 - Aug 2020

Learning to create web applications utilizing HTML, CSS, Javascript and ReactJS for the frontend, Ruby on Rails, NodeJS, PostgreSQL and MongoDB for the backend. Web apps created encompass simple HTML and CSS websites, pure Ruby terminal applications, web marketplace applications utilizing data storage and extraction within databases and the creation of Web APIs.

WEB DESIGNER | Freelance

2016 - Current

Designing websites for clients that decrease the bounce rate on their website and improve the conversion rates of customers visiting the site.
